Senior System Engineer

The Opportunity

We are seeking a highly skilled and experienced **Senior System Engineer** to join our IT Delivery team, focusing on hybrid cloud technologies with a strong background in Microsoft technologies. The ideal candidate will play a crucial role in leading the design, implementation, and management of our hybrid cloud infrastructure, ensuring seamless integration and optimal performance of both on-premises and cloud-based systems.

A snapshot of what you will be doing here:

Implementation and Management:

- Collaborate with internal and external stakeholders to implement hybrid cloud projects.

- Manage and maintain hybrid cloud environments, ensuring high availability and disaster recovery capabilities.

- Implement and manage IaaS, SaaS, PaaS solutions such as Azure Entra ID, Intune, Defender, Office 365.

- Implement and maintain security controls, monitoring, and alerting for hybrid cloud environments.

Continuous improvement:

- Ensure best practices and compliance with industry standards and regulations.

- Optimize the performance of cloud and on-premises systems.

- Implement automation and orchestration solutions to streamline operations.

Troubleshooting and Support:

- Provide ad-hoc advanced expert support for cloud and on-premises systems, resolving complex technical issues in collaboration with our ServiceDesk team.

- Develop and maintain documentation, including architecture diagrams, SOPs, and troubleshooting guides to facilitate the handover to the support team.

- Mentor and support junior engineers, fostering a culture of knowledge sharing and continuous improvement.

We are looking for an individual who:

Education and Experience:

- Bachelor's or Master's degree in Computer Science, Information Technology, or related field.

- Minimum of 7 years of experience in system engineering, with a focus on Microsoft related technologies.

Technical Skills:

- Proficiency with Office 365, Windows Server, Active Directory, Entra ID, and related technologies.

- Strong understanding of networking principles, including VPN, DNS, DHCP, and firewall configurations.

- Experience with cloud virtualization platforms such as Hyper-V and Citrix.

- Familiarity with DevOps practices (e.g., Azure DevOps, Git, CI/CD pipelines) and scripting tools such as PowerShell, Azure CLI, ARM templates and Azure Bicep.

Certifications:

- Relevant certifications such as Microsoft Certified: Azure Administrator Associate, Azure Network Engineer Associate or similar.

Soft Skills:

- Excellent problem-solving and analytical skills.

- Strong communication and interpersonal skills.

- Ability to work independently and as part of a team.
