Technology Architect

The opportunity

This is an exciting time for our company! As we expand from a European leader in airport equipment solutions to a global powerhouse, we are seeking a skilled and visionary **Technology Architect** to join our Solutions and Platform Delivery team. You will play a crucial role in enabling digital transformation, ensuring scalability, and aligning cloud strategies with our long-term business goals.

A snapshot of what you will be doing here

Cloud architecture and innovation

- Design scalable and secure cloud solutions, focusing on Azure and modern workplace Microsoft 365 cloud tools such as Intune, Microsoft defender, Power Automate, Teams, SharePoint etc.

- Lead cloud architecture improvements, including enterprise landing zones and universal printing, Azure Veeam backup.

- Drive continuous innovation and performance optimisation across platforms

Governance, compliance, and documentation

- Ensure security and compliance with internal and industry standards

- Maintain up-to-date documentation and promote governance best practices

- Manage disaster recovery strategies and support business continuity planning

Collaboration and leadership

- Work cross-functionally with tech leadership, suppliers, operations, security, and finance teams

- Provide mentorship and share knowledge with technical teams and partners

- Support strategic initiatives such as cloud migration, workforce enablement, and innovation

Operations and improvement

- Monitor and optimise performance of cloud and Microsoft environments

- Collaborate on legacy system migration and manage vendor lock-in

- Enhance operational efficiency through automation and DevOps best practices

Strategic contribution

- Support scalability, cost optimisation, and decision-making alignment

- Drive innovation aligned with business needs

- Foster collaboration and reduce long-term IT costs

We are looking for an individual who:

- Has proven expertise in Azure and Microsoft cloud environments

- Can design secure and scalable architectures with compliance focus

- Brings hands-on experience with Terraform, Python, APIs, and networking

- Demonstrates strong communication, leadership, and mentorship skills

- Thrives in a collaborative, dynamic, and fast-changing environment

- Is solution-oriented, adaptable, and curious about emerging technologies

We encourage candidates to apply if they see a strong match with the core responsibilities—even if they don't meet *every* requirement. Research shows people from underrepresented groups often hesitate to apply unless they meet *all* criteria. At TCR, we view job profiles as a guide, not a checklist. We're looking for relevance, not perfection.

❤ **We think you will love working with us**
At TCR Group, we foster a vibrant and collaborative work culture that values each team member's contributions and reflects our company values: integrity, open-mindedness, accountability, and passion. You'll have the opportunity to drive change and contribute to our mission of sustainability in aviation. We are committed to creating an inclusive environment where everyone can thrive.

About our company
At TCR Group, we are pioneers in Ground Support Equipment (GSE) solutions for the aviation industry. We provide rental, leasing, and maintenance services, ensuring reliability at over 200 airports worldwide. With our headquarters near Brussels and a team of 1,800 employees, we are a trusted global partner, delivering operational excellence and innovation.

Do you think we could be a match? We look forward to meeting you
If you are passionate about shaping digital landscapes and want to make an impact in a fast-growing and forward-thinking company, we would love to hear from you.

Please note: We kindly request that agencies and recruiters refrain from contacting us regarding this job posting.
